

SUMMER FEEDING INTENSIVE

**Are
mealtimes a
headache?**

**Does your child avoid mealtime or
"graze" on foods all day?**

**Does your child eat a limited
number of foods or eat foods only
of the same brand?**

If so, please join us for a group intervention program focusing on the sensory aspects of food and behavioral strategies to promote positive mealtime experiences. Other goals will be to:

1. Establish mealtime routines
2. Learn cues to eating
3. Increase tolerance of touching, tasting, and swallowing food
4. Increase the variety of foods your child is willing to try
5. Increase the amount of food consumed

Children will be grouped to provide opportunities for imitation and peer support.

A parent will be required to attend a group meeting to discuss the Sequential Oral Sensory program and strategies for home.

Dates of Intensive:

Session 1: June 6th-29th; Session 2: July 3rd-27th

T-W-Th

1.5 hours a day (3 weeks for a total of 18 hours)

Cost: \$450
